Aquavar ABII
VARIABLE SPEED CONSTANT PRESSURE SYSTEMS
FEATURES

The AB2 variable speed pump controller and complete booster package kits, provide an economical answer for municipal water district customers with low water pressure. Both domestic and light commercial applications can benefit. As water use increases, the controller changes pump speed to maintain pressure. Large supply tanks are eliminated and less wear and tear on your pump and motor.

Think of it as “Cruise Control” for your pump! The AB2 is available with a range of flow rates to handle homes with up to four baths, irrigation, filtration and fire suppression systems. Light commercial applications up to 100 GPM at 45 PSI boost. The AB2 is available as either a separate controller or as part of a complete pump package with everything you need to plumb it to a domestic water line.
